

## Safety-Blocking AI Governance Framework — Executive Review Packet

### Purpose

This framework exists to prevent AI systems from asserting authority they do not possess.

### Risk Addressed

Hallucinations, silent automation, and overreach in regulated domains.

### Core Mechanism

Missing consent or authority triggers an immediate halt and human escalation.

### Compliance Posture

Non-clinical, PHI-free, advisory-only, read-only.

### Assurance

Deterministic behavior, audit trail, proof-of-existence hashes.
